

consortium meeting

Wednesday, November 12th 2025

Deggendorf Institute for Technology – Pfarrkirchen

8:30–9:30

Arrival and registration

9:30–10:00

Opening Addresses

by Henrique Martins (ISCTE), Dmitry Etin (DIT) and Francini Hak (UMihno)

Opening, coordinator address, overview of agenda, day goals (10 min)

WP3 Surveys results (10 min)

Recap of project vision (10 min)

10:00–11:15

XiA Market and EU Fit

by Henrique Martins (ISCTE), Francini Hak (UMihno), Simon Lewerenz (ISCTE), Natalia Allegretti (Global Health Connector)

Format: Idea Carousel / 3 onsite stations and 3 online

This interactive session explores how XiA's training initiatives align with the evolving needs of the EU digital health market. Participants will be divided into rotating groups, mirrored online.

Each group will contribute to discussions at **3 thematic stations**:

> Stakeholder Needs Fit

How might XiA learning modules better meet the real-world needs of stakeholders? APs are especially invited to share what types of training materials they find most relevant.

> Dissemination & Integration

How can training materials be effectively integrated into educational systems, professional environments and company training programs?

> Sustainability

What models (collaborations, business cases, or infrastructures) could sustain XiA outputs beyond the project's duration?

After carousel rounds, groups will share key takeaways. A joint reflection will follow, focusing on:

> **What are our shared strategic priorities moving forward?**

> **How can XiA better support industry in digital health education?**

11:15–11:20

Break

11:45–13:00

XiA Educational Content Production Planning

by Anne Moen & Silje Henni (UiO)

Format: World Café

The objective is to review WP3 and WP4 developments and explore strategies to integrate their findings into WP5. This session focuses on aligning XiA's educational content development with stakeholder needs and strategic priorities.

The session will start with a 15 min introduction to personas, why we develop personas and the World Café format. Participants will have two thematic stations, each addressing a key aspect of educational content planning:

- > **Defining Priority Learner Personas**
- > **What characterizes each target group and what are their learning goals and opportunities / constraints?**
- > **Content Themes & Delivery Models**
- > **What topics, skills, and formats best match the needs of each target group?**
- > **Localization & EU-Wide Adaptation**
- > **How can we ensure that materials are adaptable across different EU countries and education systems?**
- > **What partnerships or translation/localization strategies are needed?**

At the Defining Priority Learner Personas and the Content Themes & Delivery Models, pre developed personas will be used as a starting point. During the sessions we would like to continue the development of the personas.

13:00–14:00

Lunch

(costs not covered by the project)

Location: Mensateria, DIT-European Campus,
Max-Breiherr-Straße 32,
84347 Pfarrkirchen

Co-funded by
the European Union

Grant Agreement 101187650

14:00–15:15

XiA curriculum development and pedagogical support for content producers

by Outi Ahonen & Katariina Husman (LAUREA)

Format: Introduction, group work, and conclusions for future development

After a brief overview of the curriculum design process and its outcomes so far, participants will work in groups to reflect on the first draft of the XiA curriculum (EQF6) and discuss what kinds of pedagogical support will be needed in creation of the MCLBs to ensure that both higher education and industry can fully benefit from the micro contents developed in the project.

15:15–15:35

Break

15:35–16:00

XiA Communication and Expansion

by Fanch Rouault (Fyrstain) and Sérgio Dinis (ISCTE)

Presentation of XiA's communication activities: key actions and events, upcoming actions, including the webinar for health ministries and national eHealth agencies, and next steps to enhance XiA's visibility in each EU Member State.

16:00–16:40

XiA Recognition Strategy and Micro-Credentialling

by ISCTE, DIT and LAUREA

Format: Consortium discussion to define the recognition and incentive strategy, including via the process for micro-credentialling at EU and national levels.

Group reflection on micro-credentials from other EU projects or universities, and the development of tactics for XiA.

16:40–17:00

Break
